

Leaflet R1 regarding the delivery of waste for energy recovery

Disposal facility: HTI Hamburg (AVG) - delivery conditions

With the below information, we wish to communicate to you the criteria for energy recovery from your waste at the hazardous waste incineration plant at Hamburg (AVG).

The delivery form is specified in the certificate of disposal/notification and is based on the properties, composition and quantity of waste, as well as the technical capabilities of the facility. It is thus imperative that it be complied with.

The waste must correspond in its entirety to the information provided to us (safety data sheets, descriptions, photos, analyses, etc.). Deviations may be invoiced with costs. Further rights remain reserved

If deviations from the delivery form are unavoidable, please urgently get in touch with your sales contact before delivery. For all other questions on waste disposal, our sales contacts are also available to you.

The leaflet only applies in combination with the specific leaflets for the input system in question (e.g. tank farm leaflet) as amended at the point of delivery. If necessary, you can always request documents to be sent. The criteria given here are thus to be considered as additional requirements for energy recovery.

In addition, our General terms and conditions (version of: 01.06.2022) and the leaflets in the version valid on the date of delivery apply (the documents can be found on our website www.indaver.de under "Service"). If necessary, you can always request documents to be sent.

EWC code: _____

Internal designation: _____

Waste producer: _____

Criteria for waste undergoing energy recovery

- Calorific value: > 11 000 kJ/kg
- Chlorine: < 5 Wt. %
- Sulphur: < 2 Wt. %
